Recycle Right!

Advanced Disposal customers are now serviced with Single-Stream Recycling. This means that all recyclables can be placed together in the same bin! No sorting necessary!

- ✓ Broken Down Cardboard
- ✓ Aluminum Cans
- ✓ Ferrous Cans
- ✓ Plastic 1-7
- ✓ Printer Paper
- ✓ Newsprint
- ✓ Junk Mail
- ✓ Magazines
- ✓ Phone Books
- ✓ Glass Bottles

Non-Recyclable Items

These items are often found in recycling bins but are actually NOT recyclable! Please properly dispose of these items.

Hazardous Waste: This includes paints, pesticides, automotive fluids, diesel fuel, aerosol cans, gasoline kerosene, & car batteries. These should be taken to a hazardous waste facility.

Wet Paper: Wet paper cannot be recycled, please dispose of it in the trash.

Hypodermic Needle: These are not recyclable and can expose workers to illnesses.

Household Glass: This includes window panes, mirrors, light bulbs, and dishes.

Ceramic & Pottery: This includes coffee mugs and flower pots. Try donating them!

Grocery Bags: Plastic bags will get caught in the recycling sorter and will cause damage to the machine. Consider taking plastic bags to your local grocery store for recycling.

Shredded Paper: Due to the small size of shredded paper, it can get mixed in with glass debris which causes damage to the paper and is no longer recyclable.

Take Out Containers: Any container that has food waste stuck to it will contaminate the recyclable material. Only recycle if it is clean of food residue. (This includes Pizza Boxes!)

Styrofoam: Single stream recycling does not have the technology to properly recycle Styrofoam.

Paper Coffee Cups: These cannot be recycled due to the plastic coating applied to prevent leaking.
