Re: Act 537 Plan

Dear Brian:

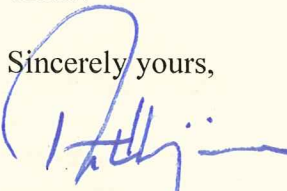

There is an area along Fairview Street that is not presently sewered and should be considered for a future sewer extension. This extension may be done in conjunction with the development of the adjacent parcel or it may occur independently.

There are presently 12 dwellings along the west side of Fairview Street that could flow by gravity into an existing manhole, designated as Manhole No. CC-10 on the attached plan. The extension would be approximately 1,150 feet in length and would include three additional manholes. The total cost estimate for this extension is approximately \$150,000. The Authority will either draw the money needed for this project from existing reserves or will borrow the money through a drawdown type bank loan. Should the extension be constructed in conjunction with an adjacent land development, the costs may be either shared with or borne by the developer under a separate agreement. We have placed this project on a timeline of 5 to 10 years and should therefore be constructed by 2021.

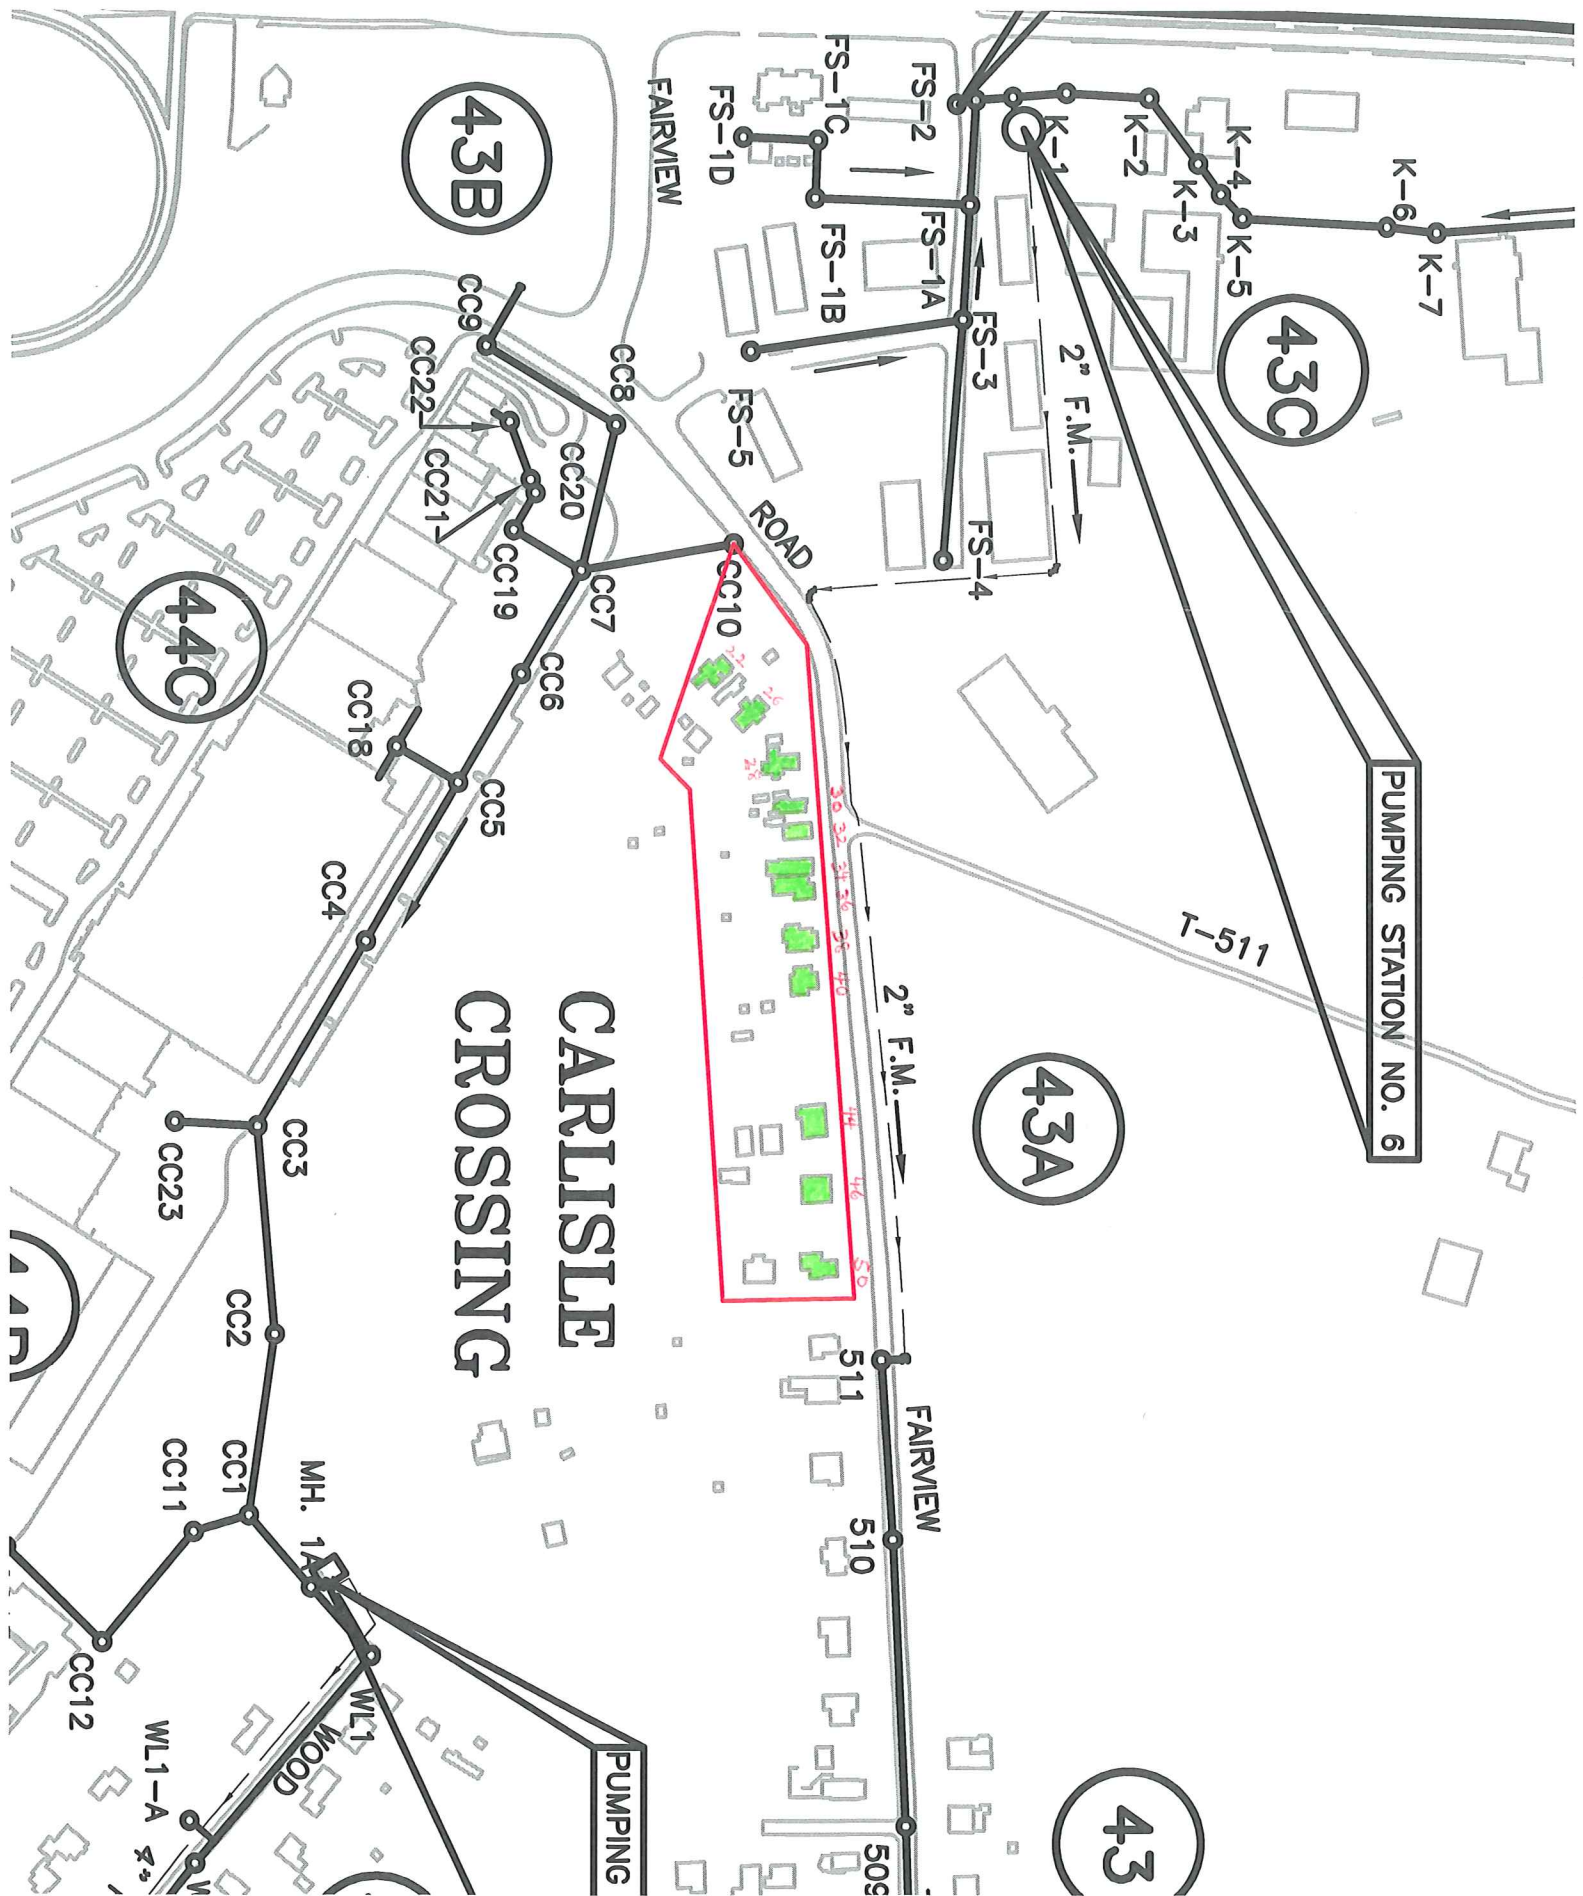

The addresses of the homes within this area that could be served by gravity are 22, 26, 28, 30, 32, 34, 36, 38, 40, 44, 46, and 50. I believe it would be appropriate to include the on-lot reports in the Appendix of the Plan.

If you have any comments or questions or require additional information, please contact me at this office.

Sincerely yours,

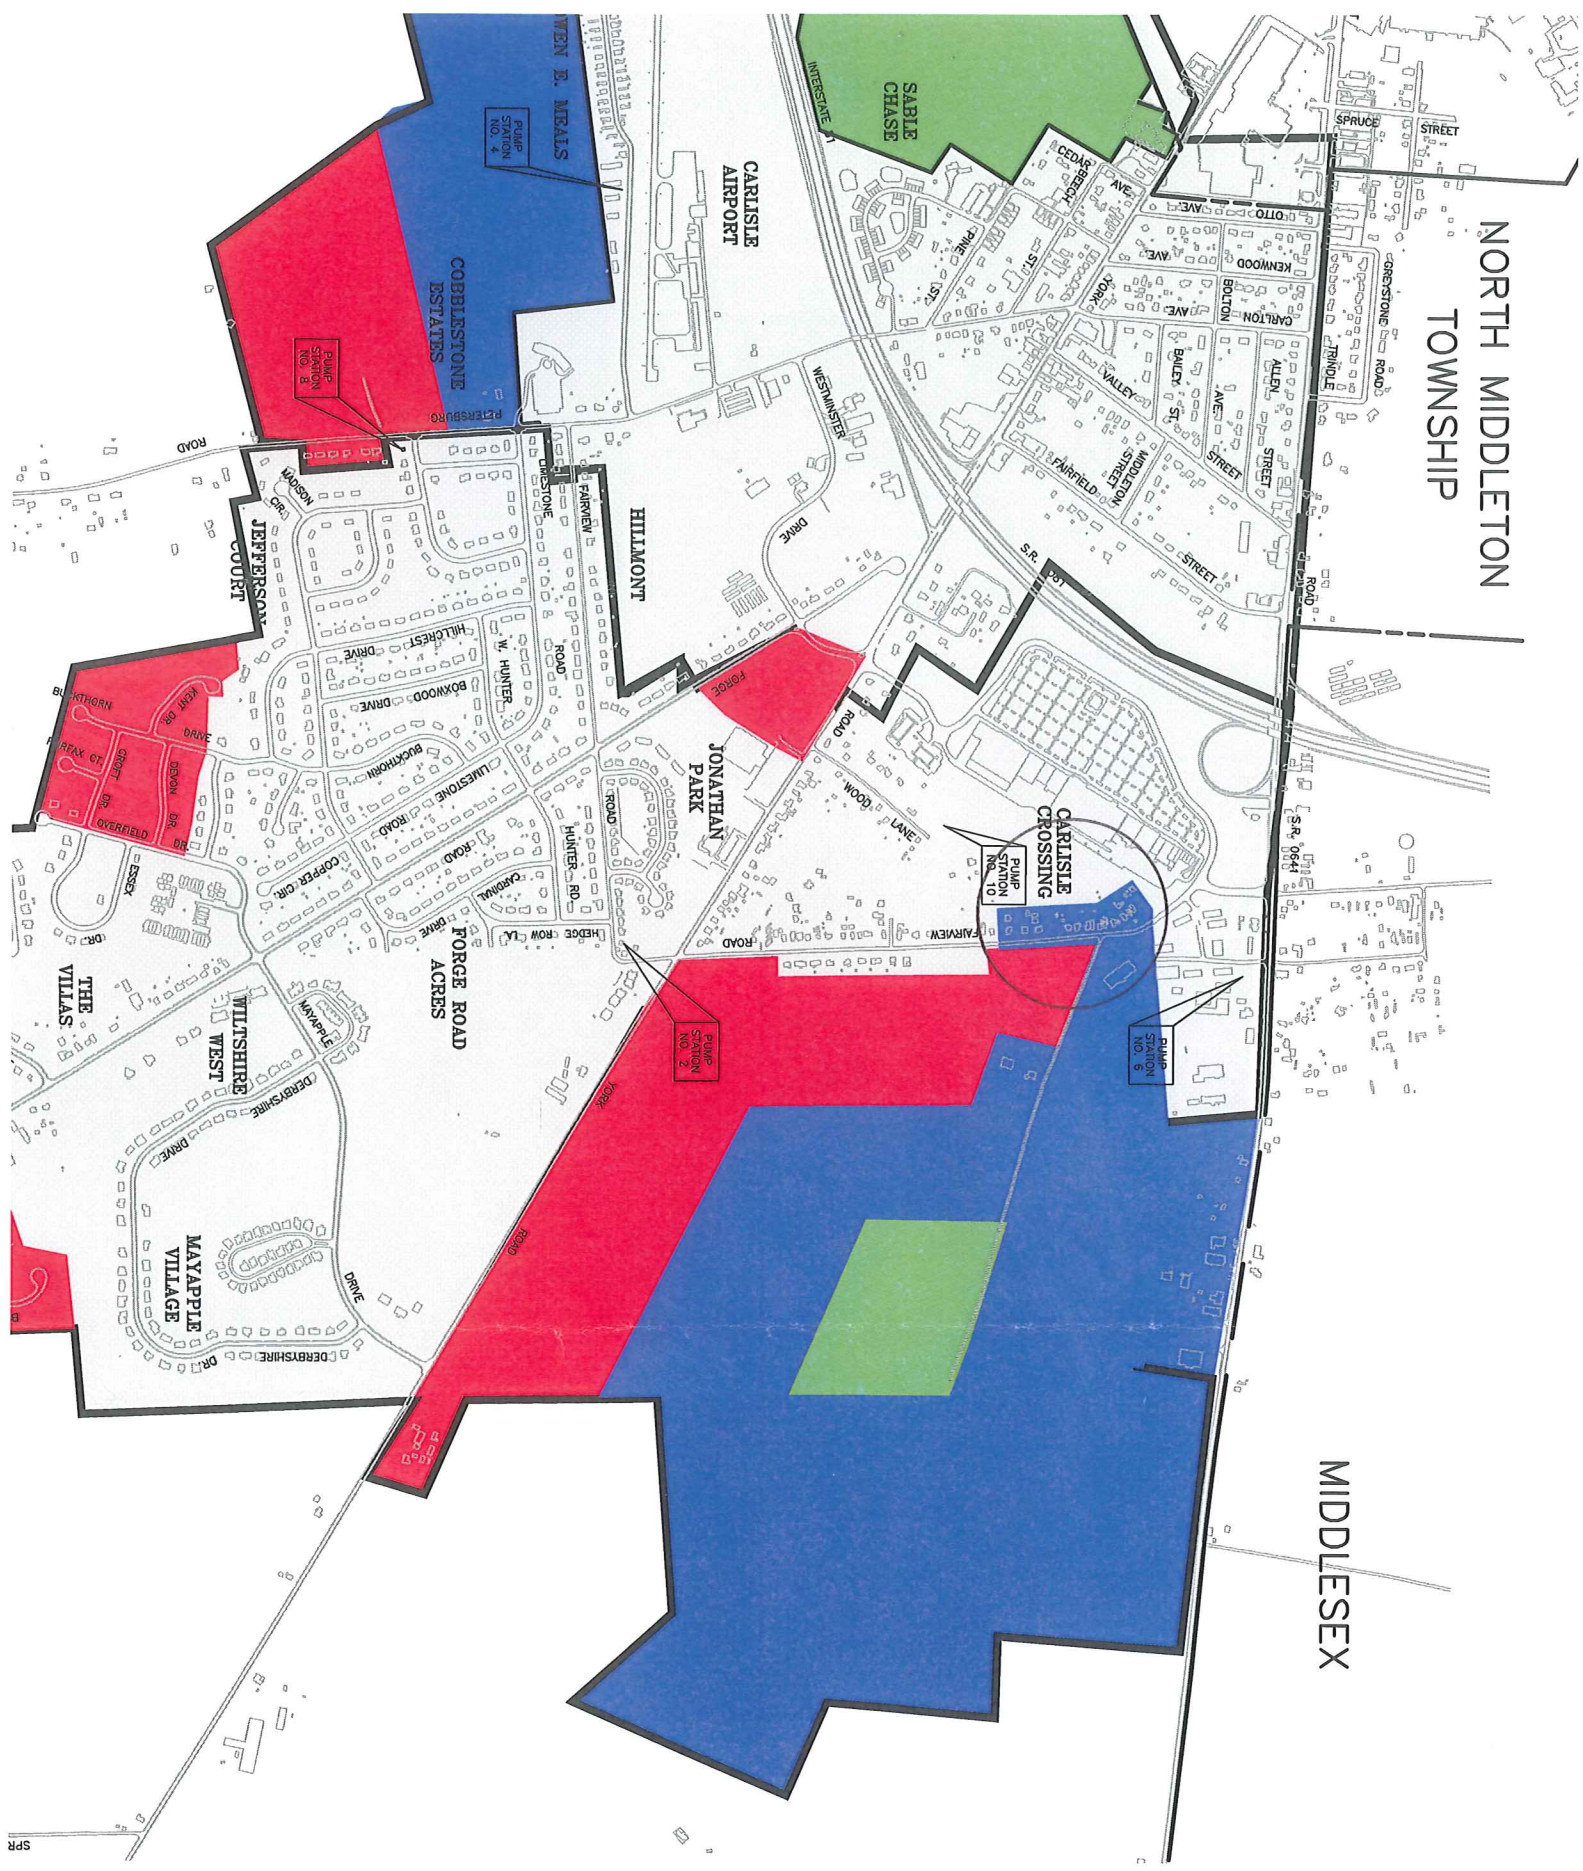

Robert L. Kissinger
Operations Manager

Re: South Middleton Township – Draft Act 537 Plan
Response to January 12, 2011 comments

Dear Bob,,

Thank you for comments on our draft Act 537 Plan.

The area in question has been added to our Plan as an alternative and has been added to the Implementation Schedule. The Sewer Service Area Map has been revised to incorporate this area as to occur within 5-10 years. The sewage management program pumping reports for these homes have been included within Appendix HH of the Plan.

Hopefully, this adequately addresses the comment.

Should you have any questions on our responses, please let us know.

At the January 21, 2011 Board of Supervisors meeting, the plan shall be adopted and then it can be forwarded to DEP for approval.

Sincerely,

Brian P. O'Neill, P.E., S.E.O.
Township Engineer
